PROFESSIONAL SUMMARY

Versatile and impact-driven Product Engineer with over 3 years of experience spanning UI/UX design, full-stack development, and blockchain integration. Adept at taking software products from initial Figma wireframes to production-ready code. Proven track record of ownership across the entire frontend lifecycle, creating intuitive digital experiences using Next.js, React, and Tailwind CSS, backed by robust backend systems in Node.js and Rust.

TECHNICAL SKILLS

- **Frontend Development:** Next.js, React JS, React Native, TypeScript, JavaScript, Tailwind CSS, Framer Motion, HTML5/CSS3, Three JS.
- **Backend & Blockchain:** Node.js, Rust, Supabase, Blockchain Architecture & UI Design, FFmpeg, NLP, AssemblyAI.
- **Design & Prototyping:** Figma, Adobe Photoshop, Adobe Illustrator, Storyboarding, UI/UX Design, Interaction Model Design, Vector Asset Design, Component Architecture.
- **Tools & Platforms:** GitHub, Notion, Zoho Suite (Deluge, CRM, Sites, Desk, People).

PROFESSIONAL EXPERIENCE

Product Engineer | LinkListCircle

Jul 2023 – Aug 2026

- **End-to-End Product Ownership:** Managed the entire software product lifecycle, serving as the sole bridge between design and code by executing everything from initial UI/UX wireframing to production-ready frontend deployment.
- **Frontend & Animation Architecture:** Built highly responsive, visually rich web applications using Next.js, TypeScript, and Tailwind CSS, leveraging Framer Motion to implement engaging micro-interactions.
- **Blockchain Integration:** Collaborated on architectural design and engineered the user interface for a decentralized web application, translating complex blockchain data into accessible consumer experiences.
- **Cross-Functional Stack:** Seamlessly integrated frontend interfaces with backend systems powered by Node.js and Rust.

Junior Web Developer | 10xGrowth, Mumbai, India

Dec 2022 – Jun 2023

- **Ecosystem Integration:** Developed and unified custom corporate environments by connecting diverse Zoho products (CRM, Desk, Mail, People) into a single, seamless workflow.
- **Custom Automation:** Programmed automated business logic and workflows utilizing Deluge (Zoho's proprietary scripting language).
- **Web Development:** Designed and deployed responsive business websites using Zoho Sites to improve client digital footprints.

PROJECTS

Vora - Personal Finance Experience | [Figma](#)

- Conceptualized and engineered the complete UI/UX ecosystem from scratch, including original branding, logo design, custom color palettes, and complex vector/SVG graphic elements.
- Designed sophisticated dashboard architectures and high-fidelity, data-dense card components in Figma, optimizing for readability and seamless mobile interaction.

FluidScroll: Interactive Portfolio & Motion Showcase | [GitHub](#) | [Site-Link](#)

- Architected a high-performance personal brand ecosystem using Next.js, TypeScript, and Tailwind CSS, optimized for production and global delivery via Vercel.
- Engineered a seamless, scroll-driven interactive layer utilizing Framer Motion, integrating advanced viewport tracking, parallax effects, and smooth spatial transitions to elevate digital storytelling.

Custom Iconography System & Asset Library | [Figma](#)

- Designed and engineered a cohesive, pixel-perfect custom icon system within Figma, built entirely from scratch using precise vector geometry.
- Optimized asset pipelines by structuring icons as responsive, scalable SVGs with consistent bounding boxes, stroke weights, and design tokens for seamless integration into frontend component libraries.

DeepRead (Multi-PDF Similarity & Context Search Engine) | [GitHub](#) | [Site-Link](#)

- Developed an intelligent document analysis platform capable of cross-referencing multiple large-scale PDF uploads simultaneously to isolate contextual similarities and patterns.
- Engineered a high-speed text processing and retrieval algorithm to scan thousands of pages, accurately serving deep-content search queries instantly.
- Built a highly responsive document viewer interface that dynamically maps and highlights queried search terms directly onto the rendering interface for optimal readability.

LI-Burogu (Executive Content & Blogging Platform) | [GitHub](#) | [Site-Link](#)

- Conceptualized, branded, and developed a dedicated blogging application from scratch for company founders, executing all creative assets including the original brand identity and logo system.
- Architected a high-performance, responsive frontend with Next.js and Tailwind CSS, managing structured multi-category data models (Tech, Personal, and Case Studies) deployed via Vercel.
- Integrated Firebase for real-time data synchronization, secure user authentication, and optimized cloud storage pipelines to maintain snappy content delivery.

BallotBlock (Blockchain Voting Platform) | [GitHub](#)

- Designed a trust-centric product interface for a decentralized polling and voting system.
- Solved transparency and security complexities for everyday users by creating intuitive, real-time visualizations of live blockchain data.

LLCircle Social App | [GitHub](#)

- Defined the mobile interaction model for a social platform built with React Native and Supabase.
- Focused on retention-driving features, implementing crisp information hierarchies and polished micro-interactions to maximize content discoverability.

AI-Based Video Summarization System | [Github](#) | [Research-Paper](#)

- Architected and deployed an end-to-end AI application that automates video content truncation, generating highly concise visual and textual summaries.
- Integrated AssemblyAI and advanced NLP techniques to handle speech-to-text transcription and semantic analysis for keyframe extraction.
- Utilized FFmpeg for programmatic video processing, managing dynamic multi-media rendering, slicing, and compression pipelines.

EDUCATION

Rashtrasant Tukadoji Maharaj Nagpur University

B.Tech in Artificial Intelligence | Jan 2020 - Jun 2023

Research Focus: AI-based Video Summarization using Natural Language Processing (NLP).

Maharashtra State Board of Technical Education

Diploma in Computer Engineering | Jun 2018 - Nov 2020

CERTIFICATIONS

- **Google Data Analytics Professional Certificate** | Google / Coursera | [Certification](#)
- **React Native: The Practical Guide** | [Udemy](#) | [Certification](#)

LANGUAGE

- **English** (Professional Working Proficiency)
- **Hindi** (Full Professional Proficiency)
- **Tamil** (Native / Proficiency in Speaking)
